IT'S A DANGEROUS WORLD

In the line of duty, you face new risks every day. Some are easily recognized. Others, like blood-borne pathogens, bodily fluids, bacteria, viruses, chemical weapons and other contaminants are difficult to detect, yet pose serious threats to public health and safety. To safeguard your health and the health of others you need to protect yourself, your equipment and your surroundings from unseen biological and chemical threats.

INTRODUCING DECON7™

The world's most effective and safe anti-microbial disinfectant and chemical decontaminant.

Effective. The powerful, proven D7 formula is used by the FBI, Secret Service, DEA, EPA, and National Guard. Originally developed by Sandia National Laboratories to neutralize chemical and biological weapons, D7 was a key component for successful decontamination of the Hart Senate Building and US Post Office in Washington, DC and NBC Studios in New York City following the 9/11 anthrax attacks.

Convenient. D7 is packaged in a patented, ready-to-use dispenser that's small enough to keep handy in your cruiser, yet powerful enough to neutralize virtually all chemicals, bacteria, viruses, spores, molds, fungus, and narcotics. Use it daily to disinfect and deodorize uniforms, patrol cars, holding cells, transport vehicles, turnout gear, and sensitive equipment.

Safe. D7 meets the demands of strict environmental laws and regulatory requirements. It is biodegradable and safe for household use, yet powerful enough to neutralize toxic and/or deadly chemicals, bacteria, and viruses within minutes.

Part No.	Product Description
7001709TF	D7 BDAS+ Training Unit
7001709	D7 BDAS+ Tactical Spray (3 Part)
7001701	D7 QuickStrike Spray (2 Part)
7001702	D7 Quart Kit
7001706	D7 2 Gallon Kit
7001708	D7 30 Gallon Kit
7001704	D7 100 Gallon Kit
7001705	D7 500 Gallon Kit
7001801	D7 CAFS Backpack Sprayer

All kits include Part One, Part Two, and Part Three (Optional Booster Solution) unless otherwise noted. For more information, please contact your D7 sales representative.

DECON7 KILLS & NEUTRALIZES A WIDE RANGE OF BIOLOGICAL & CHEMICAL THREATS

Decon7 provides the ideal delivery system for a broad spectrum of applications. The patented dispenser mixes the chemical compounds within its nozzle, producing the right mix of decontaminant every time to kill and neutralize the following biological and chemical threats:

CHEMICAL & BIOLOGICAL WARFARE AGENTS

- Fentanyl
- GA (Tabun) Nerve Agent
- GD (Soman) Nerve Agent
- GB (Sarin) Nerve Agent
- VX Nerve Agent
- Mustard Gas (Blister)
- Lewisite (Blister)
- Botulinum (Toxin)
- Bacillus Anthracis (Anthrax)
- Ricin (Toxin)
- Phosgene

BIOLOGICAL ORGANISMS

- Aspergillus niger
- Bird Flu H5N1
- Brevibacterium Ammoniogenes
- Burkholderia cepacia
- Campylobacter jejuni
- Candida albicans
- Clostridium difficile
- Corynebacterium ammoniogenes
- Enterobacter aerogenes
- Enterobacter cloacae
- Enterobacteriaceae (with extended beta lactamase resistance)
- Entrococcus Faecalis
- Entrococcus Faecium (Vancomycin resistant)
- Escherichia coli
- Escherichia coli (antibiotic resistant)
- Escherichia coli 0157:H7
- Hantavirus
- Hepatitis B Virus
- Hepatitis C Virus
- Herpes Simplex Type 1
- Herpes Simplex Type 2
- HIV/AIDS
- Human Coronavirus
- Legionella pneumophila
- Influenza A/Brazil Virus, H1N1
- Klebsiella pneumonia
- Klebsiella pneumonia (antibiotic resistance)
- Listeria monocytogenes
- Norovirus Feline
- Norovirus Murine
- Proteus mirabilis
- Proteus vulgaris
- Pseudomonas aeruginosa
- Pseudomonas aeruginosa (antibiotic resistant)
- Respiratory syncytia virus
- Salmonella enteric
- Salmonella typhi
- SARS
- Serratia marcescens
- Shigella dysenteriae
- Shigella sonnei
- Staphylococcus aureus
- Staphylococcus aureus (antibiotic resistant)
- Staphylococcus aureus (Methicillin resistant (MRSA))
- Staphylococcus pyogenes
- Trichophyton metaglyphytes
- Tuberculosis
- Vaccinia Virus
- Vibrio cholera

TOXIC INDUSTRIAL CHEMICALS

- Q-Alkyl Phosphonofluoridates, such as Sarin and Soman
- Q-Alkyl Phosphonofluoridates, such as Tabun
- Q-Alkyl, S-2-Dialkyl Aminoethyl Alkylphosphonothiolates and Corresponding Alkylated or Protonated Salts, such as VX
- Mustard Compounds, Including 2-Chloroethyl chloromethyl sulfide, Bis (2-Chloromethyl) sulfide, BIS (2-Chloromethylthio) Methane, 1,2-Bis (2-Chloroethylthio) Ethane, 1,3 Bis (2-Chloroethylthio)-N-Propane, 1,4 Bis (2-Chloroethylthio)-N-Butane, 1,5-Bis (2-Chloroethylthio)-N-Pentane, and Bis (2-Chloroethylthiomethyl) Ether
- Methylamine, Saxitoxin
- Lewisites including 2-Chlorovinylchloroarsine, Bis (2-Chlorovinyl) Chloroarsine, Tris (2-Chlorovinyl), Arsine, Bis (2-Chloroethyl) Ethylamine, and Bis (2-Chloroethyl)
- Alkyl Phosphonyldifluoride and Alkyl Phosphorites
- Chlorosarin
- Chlorosoman
- Amiton, 1,1,3,3,3-Pentafluoro-2-(Trifluoromethyl)-1-Propene, 3-Quinuclidinyl Benzilate
- Methylphosphonyl Dichloride
- Dimethyl Methylphosphonate
- Diakyl Phosphoramidic Dihalides
- Dialkyl Phosphoramidates
- Arsenic Trichloride
- Diphenyl Hydroxyacetic Acid
- Quinuclidin-3-ol
- Dialkyl Aminoethyl-2-Chlorides
- Dialkyl Aminoethan-2-ols And Dialkyl Aminoethane-2-Thiols
- Thiodiglycols
- Pinacolyl Alcohols
- Cyanogen and Thionyl Chloride
- Hydrogen Cyanide and Chloropicrin
- Phosphorous Oxichloride
- Phosphorous Trichloride, Phosphorous Pentachloride and Alkyl Phosphites
- Sulfur Minochloride, Sulfur Dichloride
